

Nutritional Analysis

Accurate nutritional analysis is essential to ensure you comply with labelling regulations and retailer specifications. Understanding nutritional content is also an intrinsic part of product development and quality control.

How can you ensure that you meet all regulatory requirements concerning nutritional declarations and avoid costly delays in getting your products to market?

Information including calorie, fat, protein and carbohydrate content is displayed on food packaging to help consumers to understand the nutritional value of the food they eat. This is alongside a range of other values including vitamin and mineral content which may also be displayed.

Each labelling requirement may vary between countries and products, and additionally individual retailers may also have their own specifications.

At Intertek, our experts can guide you through the wealth of nutritional testing and labelling requirements that are relevant for your target markets.

Our Service

At our network of laboratories located around the world, we conduct nutritional analysis and labelling reviews for all your pre-packaged food products.

Our state-of-the-art facilities are equipped to determine values for all mandatory and voluntary measures including calorie, carbohydrate, fat, protein and fibre content, as well as vitamins and minerals.

The basis for nutritional declarations may vary by country depending on the relevant law. Therefore, our specialists will adjust the testing parameters accordingly to ensure you comply.

In addition to our analytical services, our advisory experts ensure they are always up to date with the latest regulations and methodologies so they can accurately guide you through the nutritional testing and labelling requirements for your target markets.

Benefiting You

By choosing Intertek as your nutritional analysis partner, you can expect:

- Access to our cutting-edge laboratory facilities which provide accurate results in fast turnaround times
- Local expertise while delivering quality, reliability and experience
- Visibility of ingredients and consumer confidence in your products
- Access to our global network of experts, and their knowledge of local testing and labelling requirements which will help to speed your products to market
- All the support, guidance and advice you need from a well respected company with a world-class reputation

With You All the Way

Nutritional analysis is just one of a suite of services we provide to ensure the safety and quality of your products.

Intertek food laboratories can offer a full range of food testing services which include microbiology, GMO, food authenticity, contaminants, residues, nutrition labelling and shelf life.

We can also assist with:

- **Risk Management:** Improve performance, reduce risk and free up valuable resource
- **Traceability through the supply chains:** including raw and semi-manufactured foodstuffs and final products in all food categories and special interest products
- **Global Coverage:** network of highly skilled and experienced experts to ensure smooth transition in the supply chain
