

GAS FIELD APPROVAL PROGRAM

How Intertek helps customers comply with CSA B149.3

Intertek’s Gas Field Approval Program is customized to evaluate the most complex designs, including one-off gas equipment.

CSA B149.3 is the code for the field approval of fuel-related components on appliances and equipment.

Targeting Canadian gas and propane industry workers, this standard has been reviewed by regulatory authorities across Canada, and has been adopted into law in every Canadian province and territory. CSA-B149.3-10 provides requirements for fuel-related components and accessories and their assembly on appliances & equipment utilizing gas.

When do Field Inspections apply?

- Custom-built equipment that does not have the required compliance labels for Canada.
- Imported equipment sold in Canada that does not have a required label to prove it complies with Canadian requirements.

The Intertek Advantage

We offer fast turnaround times and reduced travel costs with localized service for Gas Field Approvals across Canada.

Our Inspectors will walk you through the process, evaluate your product and assist you in obtaining approval from the Authority Having Jurisdiction (AHJ).

Intertek

Products found to comply with CSA B149.3 (and/or other applicable standards) are labeled on the spot with Intertek’s ETL Listed Mark. The ETL label is a visual proof to inspectors and AHJs that the equipment has met applicable requirements.

The ETL Listed Mark is the fastest growing certification mark in North America, widely accepted by AHJs and building code officials. We’ll keep you from getting red-tagged (or get you back in business – fast in the event you call us AFTER a visit from an AHJ/official!).

Global Certifications, Local Offices, Flexible Services

Intertek has one of the largest and most experienced Special Inspection teams available at multiple locations worldwide. Our commitment to your success doesn’t stop at testing and certification – we react quickly, quote competitively and deliver the highest levels of service available.

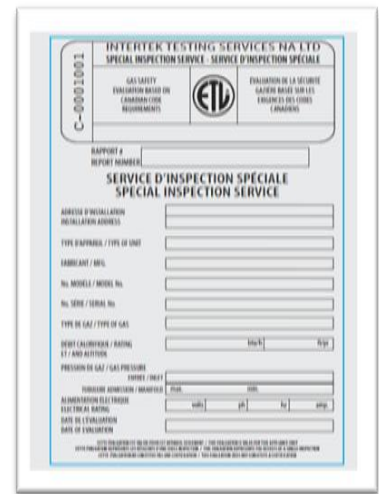

GAS FIELD APPROVAL PROGRAM

Valued Quality. Delivered.

The ETL Special Inspection Label

Once your equipment has been evaluated and is found to be in compliance with industry standards and requirements of the AHJ, the Intertek inspector will apply an ETL Special Inspection Label. The ETL Label is the proof you need and indicates to AHJs that your equipment meets all specified safety requirements.

About Intertek

Intertek is a leading quality solutions provider to industries worldwide. From auditing and inspection, to testing, training, advisory, quality assurance and certification, Intertek adds value for its customers by helping improve the quality and safety of their products, assets and processes. With 25 locations in Canada and a network of more than 1,000 laboratories and offices and over 36,000 people in more than 100 countries, Intertek supports companies' success in the global marketplace, by helping customers to meet end users' expectations for safety, sustainability, performance, integrity and desirability in virtually any market worldwide.
