Product Safety and Hazard Communication

CANTOX
HEALTH SCIENCES INTERNATIONAL

Developing well thought-out hazard communication strategies is key to delivering your product quickly and efficiently to the market. Global hazard-communication legislation is changing at an ever-increasing pace. Jurisdictions that previously had no such legislation are implementing new legislation to protect workers and consumers when handling chemicals. Other jurisdictions are changing their legislation to implement new knowledge related to toxicology of materials or other hazards. Many of which are implementing legislation to harmonize their requirements with other countries.

Intertek has an unparalleled understanding of the intricacies associated with global hazard communication legislation and we have helped our clients to develop successful product-safety strategies, and to follow through with the preparation of the necessary hazard-communication documents.

Your Challenge

Hazard communication requirements differ around the world and comprise a diverse set of hurdles including: locating and validating toxicological and ecotoxicological data; handling multiple-jurisdiction requirements in a single document; differences associated with

nanotechnology products; protecting trade-secret ingredients to name just a few. You need a clear understanding of the regulatory requirements to enable you to bring your products to a global market. A clear hazard communication strategy ensures timely and successful market delivery.

Our Solutions

To ensure that our clients' products get to market quickly and that less time is spent dealing with regulatory requirements, Intertek Cantox offers the following hazard-communication related services to the producers, suppliers and users of industrial, commercial and consumer chemicals:

- Interpreting legislation;
- Designing global hazard-communication strategies;
- Classification of substances and products;
- Developing product-safety assessment programs and establishment of exposure limits;
- Authoring/maintaining/reviewing SDS and workplace labels for worldwide compliance;
- Protection of confidential business information;
- Conducting risk and hazard assessments for new and existing products; and
- Preparing consumer chemical product labelling and support documents.

About Intertek Cantox

Intertek Cantox has considerable expertise and experience helping companies understand and comply with hazard communication requirements. We help companies do the right thing, the right way, the first time, so that they successfully comply with the various legislative requirements or voluntary programs worldwide. Our staff have developed excellent working relationships with important domestic and international trade associations and with government contacts worldwide.

The Intertek Advantage

Intertek is a leading provider of quality and safety solutions serving a wide range of industries around the world.
