

EU Packaging Services

The Challenge

The European Union Directive on Packaging and Packaging Waste (94/62/EC) restricts the presence of certain heavy metals in packaging with the goal of protecting the environment from hazardous substances and materials. The Directive also includes requirements for registration, reporting, and recycling in each EU Member State where a company is considered the producer. This EU Directive scope covers all household, commercial, and industrial packaging waste in the European Union market.

How does your company plan to comply with the EU regulatory requirements?

The Solution

With offices located around the world, Intertek has global and local experts who can work with you and your suppliers to ensure legal requirements are met. Intertek's EU Packaging Directive compliance services include:

- Determination of EU Directive 94/62/EC compliance requirements
- Assessment of sales model and producer status for each EU Member State
- Registration with Responsible Body for each EU Member State (as needed)
- Implementation of collection and recycling systems
- Identification of ongoing reporting requirements
- Testing and declaration to European Normative EN 13428, Packaging Requirements specific to manufacturing and composition
- Packaging consulting and support:
 - Complete project management
 - Q & A support
 - Corporate training and education
 - Updates on legislation, jurisdictions, & enforcement
