

## EU WEEE Registration

### The Challenge

Compliance with the EU Waste Electrical and Electronics Equipment (WEEE) Directive (2002/96/EC) is mandatory for the sale and importation of electronics into the European Union. The WEEE legislation is implemented separately in each of the 27 EU Member States.

To avoid shipping barriers or fines upon import into the European Union, electronic producers need to be aware of each country's regulations, definitions and compliance organizations, and register with the appropriate authorities in each EU Member State. How does your company plan to comply with WEEE requirements?

### Our Solution

Intertek's WEEE registration services provide registration and on-going support for WEEE registration requirements in all major EU states, including reporting of sales and take-back information. WEEE Registration Services include:

- Determination of client's EU WEEE responsibilities
- Country-by-country registration with responsible local authorities
- Implementation of take-back and recycling solutions
- On-going data reporting to WEEE authorities
- Consulting and support

Intertek's WEEE Registration Services are designed to adapt and conform to:

- Each country's rules and regulations
- All ten EU WEEE Directive categories
- Both business-to-business (B2B) and business-to-consumer (B2C) markets

Intertek is committed to simplifying your corporate requirements and giving you the competitive advantage you desire.
