

About Us

Intertek is a leading provider of quality and safety solutions serving a wide range of industries around the world.

We help local and global businesses and organizations ensure that their products and processes meet industry standards and consumer expectations for safety and quality in virtually any market around the world, and to respond to market demand for speed and innovation.

For more than 100 years, companies have turned to Intertek for support in understanding standards and regulatory risks, benchmarking performance, and developing sustainable business strategies. Our technical knowledge and breadth of business experience help our clients strategically manage the regulatory and market dynamics that affect their successful performance.

Our services cover every aspect of product development, operational and manufacturing process, marketing, supply chain management, safety, quality and sustainability.

Our clients span diverse industries and include some of the world's leading brands; among them, Shell, Canon, McDonalds, BP, IKEA, Nestlé, ExxonMobil, LG, GAP, Valero, Panasonic, Tesco, ChevronTexaco, Marks & Spencer and Levi Strauss. Governments and governmental organizations around the world are also clients.

Why do companies choose Intertek?

We've earned a reputation for helping our clients increase consumer trust in their brands and gain competitive advantage.

We go beyond testing, inspecting and certifying products; we help clients improve performance, gain efficiencies in manufacturing and logistics, overcome market constraints, and reduce risk.

By partnering with us, clients sharpen their competitive edge through

- Adherence to world-class standards that enhance the value of their brands;
- Faster regulatory approval and product entry to global markets;
- Greater insight into local legislative, cultural, and market conditions;
- Cost-effective and sustainable global manufacturing and sourcing strategies;
- Safety and quality across their supply chains;
- Reduced health, safety, and security risks, and
- Optimization of their infrastructure, process, and people assets.
