

Sign Testing & Certification

Intertek Services for the Sign Industry

Intertek

Valued Quality. Delivered.

Intertek maintains vast experience performing testing, inspection and certification for the sign industry. We perform sign inspections for new installations, provide baseline inspections for existing signs that have never been inspected, and help our clients create a schedule for re-inspection down the line.

Our ETL Mark is the fastest growing electrical safety mark in North America, and is accepted by Electrical Inspectors, Code Officials, Health Inspectors, Fire Inspectors, Fire Marshals and key industry associations across the country.

For decades, we've been building our reputation and our brand among key AHJs, including those in Florida, New Jersey, Texas and Nevada, to ensure your products will be accepted in the field. Intertek is an OSHA-recognized NRTL and therefore entitled by the Federal Government to test and certify products within our scope of accreditation.

Did you know...?

- Most existing signs have never been inspected or tested by certified personnel
- Approximately 65% of signs inspected have quality and / or fabrication issues requiring re-work or repair

Intertek Services for the Sign Industry

- Signage Inspection:
 - New installations
