

What Goes Into the Quality & Performance Mark?

“Baseline” quality tests

(1 to 5 tests are performed to expert specifications)

- Durability: Evaluates range of conditions product can handle and continue to function
- Functionality: Performance of product’s functions & features under normal use
- Life Cycle: Evaluates how long product lasts in normal operation
- Usability: Ease of use for intended tasks
- Workmanship: Verifies product’s physical characteristics for high quality fabrication

Third party verified testing

“Independently tested for Quality and Performance”

“Above and Beyond” tests

- Manufacturers Claims: (Optional 6th test highlights manufacturer’s differentiators. Test results on swing tags, POP, website)
