

Special Inspections for Canada

Intertek offers NEXT DAY Special Inspection Services to SPE 1000 for Electrical Equipment in Canada

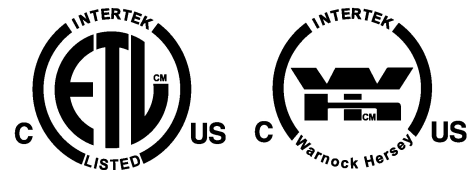

If custom-built or imported equipment is sold in Canada and does not have a required label to prove it's complies with the Canadian requirements, rely on Intertek's Special Inspection services.

Special Inspection services are not intended to replace full certification. However, there are situations that require inspections on the spot to verify compliance. Products found to comply with SPE-1000 are labeled on the spot. This label is a visual proof to inspectors and AHJs that the equipment is approved.

Choose North America's Preferred Mark

In addition to our Inspection Body (IB) accreditation, Intertek is also an SCC-accredited Testing Organization (TO) and Certification Body (CB). Intertek is recognized by the world's leading code bodies; as a Nationally Recognized Testing Laboratory (NRTL) by OSHA; recognized by Standards Council of Canada (SCC); and A2LA, APLAC, and ILAC accredited for Asia and other parts of the world. Our additional accreditations include those by the Standards Council of Canada (SCC), the National Evaluation Service (NES), the American National Standards Institute (ANSI) and the International Code Council - Evaluation Service (ICC-ES).

To schedule a special inspection, call **1-800-668-8378** or contact your local sales account manager:
