

Food Analytical Services

Your Challenges

From the farm to the fork, the entire food industry itself has evolved into a diverse network of multiple channels. More often we find the core operational structure, as well as various business processes involved in food production and distribution, fail to communicate and align with one another.

If analytical procedures, policies, best practices, and standards are not understood, implemented, and embraced by all parties involved, not only is the quality of the food produced at risk, but also the reputation and brand value of the company behind it.

Our Solutions

Intertek provides a comprehensive range of analytical services for all regions as follows:

- Antibiotics
- Food additives & preservatives
- Food-contact packaging and substance migration
- Genetically modified organism (GMO) testing
- Heavy metals
- Microbiology
- Nutritional labeling
- Pesticides
- Physical & chemical content
- Sensory analysis
- Toxic substances

Analysed products include:

- Ambient stable hermetically sealed (e.g. canned) foods
- Bakery products
- Cereals
- Confectionary
- Dairy
- Dried Goods
- Drinking water
- Drinks and beverages
- Egg
- Fish & fish products, seafood
- Food ingredients
- Health foods
- Meat & meat products
- Poultry
- Produce
- Ready to eat/heat food
- Snacks
