

Comply with Cosmetics GMP – ISO 22716

Your Challenges

One of the principle new features of the European cosmetics regulation is compliance with Good Manufacturing Practice (GMP).

One of the major aims of GMP is to ensure the quality and safety of cosmetic products in circulation within the European Union. Beyond the regulatory aspect, ISO 22716* certification helps you to improve your brand image, facilitates your exports and prepares you for inspections by the relevant authorities.

By 2013, all cosmetic products placed on the European market must be manufactured according to the GMP regulations. Compliance with ISO 22716 is a presumption of conformity to the GMP recognized by the competent authorities.

Our Solutions

Intertek's significant experience in the cosmetics industry and coupled with our auditor network in close proximity to production sites in Europe, America and Asia, make us a strong preferred partner to guide you throughout the GMP implementation process including:

- Assessment (preliminary audit)
- Training
- Final Audit
- Issuance of an ISO 22716* Certificate of Conformity

Intertek

*Pursuant to the regulations in effect, ISO 22716 certification constitutes a presumption of compliance and does not replace inspections by the relevant authorities.
