

Clinical Research Studies

Your Challenges

In a world where quality products, health and well-being of consumers are true priorities, you are looking for a partner able to bring a complete package to you for Safety, Efficacy & Claim support testing services.

Consumers are aware of the importance of product safety but there is an increasing need for robust scientific proof of any benefits claimed. To meet our customers' needs for a reliable partner, Intertek is rapidly becoming established as a leading supplier of safety and efficacy testing.

Our Solutions

Intertek provides clinical research services in the areas of personal care, oral care, nutrition, O.T.C pharmaceuticals and medical devices.

Operating from multiple research centres we offer access to a large, characterised, volunteer database and a diverse network of investigators including dermatologists, dentists, GPs, biochemists and statisticians.

Safety / Tolerance

- Primary Irritation (Patch test)
- Cumulative Irritation
- Repeat Insult Patch Tests: Sensitisation (HRIPT)
- Phototoxicity & Photosensitisation
- Comedogenicity
- Soap Chamber Tests
- In-Use Safety
- Ocular Irritation

Efficacy

- **Personal Care:** Antiperspirants, Anti Dandruff, Depilatories, Foot Care, Hydration, Pigmentation, Skin-ageing & Sun Protection
- **Oral Care:** Plaque, Gingivitis, Stain removal & whitening, Caries, Sensitivity, Calculus, Malodour, Abrasivity
- **Nutrition:** Skin Benefits, Well being, Cardiovascular health & lipid regulation, Gastric comfort, Satiety, Gut transit
- **Healthcare:** Acne, Analgesia, Cold Sores, Dermatitis, Hair Growth & Head Lice, Psoriasis, Sexual Health/Well-being, Wound dressings

Intertek offers a complete solution for clinical studies, from the protocol redaction to report delivery.

To optimize cost and deadlines, efficacy studies can be reversed to tolerance studies.
