

Organic Certification

At Intertek, it is our sole mission to provide not only the one-stop-shop you seek for all food services, but also establish a trusted partnership with your business - consistently adding value and increasing your competitive advantage in the industry with every step we take together.

Your Challenges

Organic agriculture is based on growing crops and livestock through the use of soil-enriching systems. Organic farmers maintain soil fertility with practices such as cover crops, compost and control pests with crop rotation and other natural methods. Organic farming excludes the use of synthetic fertilizers and pesticides, plant growth regulators, and livestock feed additives. It encourages sustainability and enhances the health of ecosystems and organisms. **National Standard for Organic Production (NSOP), COUNCIL REGULATION (EC) No 834/2007, National Organic Program (NOP) and International Federation of Organic Agriculture Movements (IFOAM) are the main guidelines for organic production and its verification.**

Our Solutions

Certification is the process of securing third party verification of organic production practices. It involves establishment of an organic system plan that explains activities from the farm to the labeling of the finished product.

Intertek is an accredited certification agency for organic against NPOP standard to support and certify farms, orchards, natural harvest from forest areas, as well as the basic preparation, packing and processing of all these commodities. Intertek can meet your diverse certification needs with:

- **Awareness/Training**
- **Individual Operator Certification for Farm Units**
- **Grower Group Certification**
- **Processing Unit Certification**
- **Chain of Custody Certification**
- **Organic Input Inspection**
