

Sanitary-Epidemiological Conclusion (Hygienic Certificate)

Your Challenges

You are exporting your products to Russia: your shipment may be accompanied by a Hygienic Certificate. The Sanitary-epidemiological Conclusion is issued by RosPotrebNadzor, the Federal Service for supervision in the field of consumer's rights protection and public safety. This certificate confirms the compliance of your products to the Russian Sanitary Norms and Rules, and enables you to prove to the customer their safety.

The Sanitary-epidemiological Conclusion concerns:

- All the products included in the "List of products subject to hygienic expertise"
- Imported products and local production on the same basis

The Hygienic Certificate is issued on the basis of:

- Technical documents
- Tests results of laboratories accredited by Russian authorities
- Expertise

The Hygienic Certificate is valid for up to 5 years.

The Sanitary-epidemiological Conclusion is needed in 90% of cases as a prerequisite for further Mandatory Certification, such as Mandatory Gost-R Certification or Mandatory Certification to Technical Regulations.

Who can you turn to get these certificates?

Our Solutions

Intertek offers you a custom-made service along the certification process:

- Analysis of your needs
- Costs Estimation & Optimization
- Procedure to follow
- Documents review (and translation if needed)
- Testing of samples
- Audit of production site organization if needed
- Deliver original and certified copies of the certificates
- Obtain all related certificates

Intertek helps you to prove the compliance of your products to Russian National Standards and paves the way to your success on the Russian market place.
