

A close-up photograph of a baby with light brown hair and blue eyes, wearing a red and white striped shirt. The baby is crawling on a light-colored carpet and is looking towards the right with a happy expression, tongue sticking out. In the foreground, the baby's hands are on a colorful toy xylophone with keys in blue, green, yellow, and orange. The background is a blurred indoor setting with a red wall.

# Your Challenges

The requirements for toy testing become increasingly stringent with each day that passes. Many countries have established their own safety regulations for these items and you must ensure that your products comply with relevant standards before your goods can be sold in these locations. Manufacturers have been held liable for injuries and fatalities resulting from design flaws, use of unsuitable materials and substandard production.

# Our Solutions

As the largest player in the toys, games, and premium testing industry with over 1,000 laboratories and offices in over 100 countries, Intertek can help safeguard its clients – providing product safety testing, certification, inspection, evaluation and quality assurance services including:

- Design evaluation
- Initial product specification analysis
- Factory evaluation
- Mock-up sample study
- Feasibility testing
- Endurance, performance, and life testing
- Pre-production inspection
- During production inspection
- Safety testing in pre-production, during production, and after production
- CPSIA (Consumer Product Safety Improvement Act) testing utilizing Intertek's CPSC accredited labs across the globe
