

Ensure the export of your used machinery runs smoothly

If you're intending to export any used machinery or equipment to India it is mandatory that a Chartered Engineers Certificate (CEC) is issued before being shipped.

Intertek International are a world-renowned inspection and testing company experienced in issuing CEC's by our fully qualified IEE and IMechE inspectors.

Our inspectors will:

- Undertake a physical inspection of all machinery and equipment for assessment of condition
- Provide full details of the equipment's original value, current value, the date of manufacture, serial number, details of any remedial work and the potential cost required to bring the equipment back to a good condition

Intertek also offer a range of Verification Services worldwide including, Quantity and Quality Inspection, Supplier Audits, Container Services (loading and unloading) and Production Checks to name a few. For more information on these and our other services please go to www.intertek.com/government/services

If you would like Intertek to issue a Chartered Engineers Certificate for machinery being exported to India, contact us on:
