Building
SCIENCES

Intertek

Indi has a decade of design and consulting experience in the acoustic and technology fields. His project experience includes auditoriums, concert halls, corporate and executive office facilities, data centers, healthcare facilities, higher education schools, K-12 schools, mixed-use commercial and residential buildings, private residences, residential towers, and television / broadcast / recording studios.

His musical, architectural, and engineering backgrounds have provided him with hands-on experience on a variety of projects and clients world-wide. He has successfully delivered hundreds of projects and millions of square feet of project work on time and within budget. Above all, his philosophy of leading with gratitude allows him to retain clients and makes him a sought-after team member.
