As the timber industry of Malaysia strives to remain competitive in these challenging times, more product regulations and technical requirements have been put into place by importing countries. This has contributed to a significant increase in cost as certification and auditing fees will have to be borne by the industry. Not only that, the auditing and certification processes are also challenging.

Therefore, MTC is organizing a Seminar on Regulatory Updates in the U.S. and E.U. on CPSIA, CARB and REACH in conjunction with Intertek Testing Services (HK) Ltd. The Seminar will focus more on the certification process and what the industry needs to know during the auditing and certification process.

**CONTACT**
For further enquiries, please contact
