## Panel Builder Training

### Upcoming Locations & Dates\*:

- October 21-22, Columbus, OH
- October 27-28, Minneapolis, MN
- November 4-5, New York Metro
- November 18-19, Boston Metro
- December 2-3, Dallas Metro
- December 16-17, Chicago Metro

### Details:

- Courses cover multiple requirements of panel compliance, including updates to UL508A 2nd Edition effective 12/20/14
- Taught by technical experts with extensive practical and field experience
- \$750 per person for first or second registrant per company / \$350 per person for additional registrants over two per company
- **Attendee bonus - Listing Cost Savings!:** Attendees may purchase ETL panel listing for \$1500 one-time fee. Attendees currently in another program may convert existing Panel Builder to ETL for \$1000. No site visit necessary!

The standard for the safety of Industrial Control Panels - UL 508A 2nd Edition went into effect as of December 2014. That represents the enforceable date for requirements to the entire UL 508A 2nd Edition, including many changes that were previously unenforced.

Attend upcoming training, covering:

- UL 508A detailed review, including specific updates to the 2nd Edition
- Implications & new enforcement plans for recent standard changes and previously unenforced requirements
- Requirements for general-use Industrial Control Panels
- Requirements for specific-use Industrial Control Panels such as enclosures, industrial machinery, and crane control
- Control panel definitions and examples
- UL 508A implications to components, low-voltage limited energy circuits, control circuits transformers, grounding, wiring, motor loads, switching devices, SCCRs, and more

*\*Classes end at Noon the second day.*
