

Hearth Products

Testing and Certification Services

Valued Quality. Delivered.

When you work with Intertek, you receive the knowledge and operational excellence that only an experienced testing partner can provide. Intertek has been testing and certifying hearth products for over 20 years to safety, performance, and energy efficiency standards for fireplace inserts, grills, wood burning appliances, chimneys and more.

Intertek engineers are committed to providing fast, accurate testing and certification to industry requirements. We evaluate efficiency requirements for outdoor boilers and gas fireplaces and conduct EPA emissions testing and validation for product efficiency claims.

Once your product compliance has been determined, your product is eligible to bear Intertek's recognized and accepted Warnock Hersey certification. The WH-ETL Mark reflects your commitment to product safety and quality to inspectors, builders and end-users. We can also work with you to develop ongoing compliance testing programs to ensure that new product components do not compromise the quality and performance of your product.

Quick Intertek Facts

- As experts in the industries of our customers, we provide a complete quality and safety solution with the services that they need.
- Intertek Group plc is listed on the London Stock Exchange – FTSE 100
- We operate in more than 100 countries with over 35,000 employees

Valued Quality. Delivered.

Product Expertise

Throughout our network of accredited labs, we provide testing and certification services for a wide range of hearth products, including:

- Solid fuel burning appliances including biomass appliances
- Solid fuel burning stoves, boilers and fireplaces
- Wood, gas, corn and wood pellet-fired stoves
- Fireplace inserts
- Factory built fireplaces
- Gas grills and barbecue appliances
- Chimney systems and other accessories
- Pellet Fuel Institute Testing Lab

Ensuring that appropriate product certification marks appear on your product will help you reach your target market without delay. From complete testing and certification to post-product introduction testing, we'll help you identify the options and alternatives that are right for you.

Utilizing our global network of labs, Intertek tests and certifies your products to meet European and North American codes and standards, including ISO, ANSI/UL, ASTM, CSA, EPA, ULC, NFPA and ICC. We hold accreditations from the world's leading accreditation bodies, including ICC-IAS, A2LA, OSHA, and the Standards Council of Canada.

The new WH-ETL Mark is the next evolution of the Warnock Hersey certification and will be issued for all new building product certifications. As a Nationally Recognized Testing Laboratory (NRTL) and a partner to the industry, Intertek is committed to a smooth transition to the new mark and working with our clients to ensure access to whatever markets they wish to pursue.

Satellite™ Data Acceptance Program

By using existing facilities, manufacturers can coordinate their testing and certification process with the actual product development cycle. If you have an in-house testing laboratory and are looking for a fast and efficient certification alternative to enhance your competitive advantage, Intertek's Satellite Data Acceptance Program is right for you.

Building Products Services

For over a century, Intertek has helped its clients address complex product testing and certification challenges. With today's continued innovations in sustainability, fire resistance, and energy efficiency, we work with you to facilitate compliance to local and global regulations and building codes, and provide faster, more cost-effective product testing and certification.
