

HVACR TESTING CHAMBER DESIGN SERVICES

PUTTING OUR EXPERTISE TO WORK FOR YOU.

Intertek has decades of experience in building, upgrading, operating, managing, and designing HVACR test chambers. We provide design services that meet your needs for both today and for the future.

Facility Design Development

HVACR manufacturers worldwide are designing, building, and upgrading their own R&D facilities. Their goals range from developing new innovations, enhancing quality, improving testing accuracy, and preparing to meet new or changing industry standards.

With all these objectives in play, it makes sense to rely on the world leader in HVACR testing to make these goals a reality.

Why Intertek?

- Custom laboratory and facility design services gives HVACR manufacturers the ability to optimize their operations while minimizing risk in their investment
- Our resume includes the design and/or build of more than 50 HVACR facilities around the world
- More than a century of combined experience. No one has more expertise at building and operating HVACR test facilities.

Key Services

New Test Facility Development

We will partner with you to design and build a chamber or fixture that meets your specified objectives. We'll analyze your markets of opportunity, the scope of the project, your growth plans, budget, and timeline, as well as any regulatory requirements.

Upgrade Existing Facility

Intertek's experts will work closely with your team to provide an updated solution that meets your specific objectives. As standards, products, and technologies change, so do your testing needs and equipment.

Training and Support

Once your system has been installed, Intertek's involvement continues to help ensure your long-term success and ROI. We offer ongoing training on the test equipment and evolving standards, and we'll also provide correlation either in our own labs or through a full Laboratory Evaluation and Adjustment Plan (LEAP).

SATELLITE™ Data Acceptance Program

Intertek's SATELLITE™ Program improves speed to market by allowing you to perform your own on-site testing, plus access to the necessary product certification marks for every market you wish to enter.
