

Standard Information

Standard Number: UL 2158 / CSA C22.2 No. 112

Standard Name: Electric Clothes Dryers

Standard Edition and Issue Date: UL's 4th Edition, CSA's 10th Edition Dated December 18, 2015

Date of Previous Revision of Standard: January 29, 2015

Effective Date of New/Revised Requirements

Effective Date: **March 8, 2019**

Impact, Overview, Fees and Action Required

Impact Statement: A review of all Listing Reports is necessary to determine which products comply with new/revised requirements and which products will require re-evaluation. **NOTE:** Effective immediately, this revised standard will be exclusively used for evaluation of new products unless the Applicant requests in writing that current requirements be used along with their understanding that their listings will be withdrawn on Effective Date noted above, unless the product is found to comply with new/revised requirements.

Overview of Changes: New and revised requirements for Instruction Manual, Testing and Components .
Specific details of new/revised requirements are found in table below.

If the applicable requirements noted in the table are not described in your report(s), these requirements will need to be confirmed as met and added to your report(s) such as markings, instructions, test results, etc. (as required).

Client Action Required:

Information – To assist our Engineer with review of your Listing Reports, please submit technical information in response to the new/revised paragraphs noted in the attached or explain why these new/revised requirements do not apply to your product (s).

Current Listings Not Active? – Please immediately identify any current Listing Reports or products that are no longer active and should be removed from our records. We will do this at no charge as long as Intertek is notified in writing prior to the review of your reports.

Standards Update Notice (SUN)

Issued: July 19, 2017

Description of New/Revised Technical Requirements

Clause	Verdict	Comment
6.2.2.4		Item 14 was revised adding wording to be included in the Instruction Manual.
7.9		Clause adding the test procedure for evaluating bottom accessibility to current carrying parts.
12		Section added specifying the Cool Down Period test be conducted on appliances.
14.1, 29.3.1 and 29.3.6	Info	Clauses revised permitting the alternative use of DC potential for conducting the Electric Strength Test.
16.4.3 and 16.4.4		Clauses revised specifying the Breakdown of Belts or Parts and the Interruption of Water Supply test be conducted under various blocked outlet conditions and all temperature regulating devices by-passed.
16.8		Clause added specifying the Nichrome Wire Test be conducted, if necessary, to evaluate the flammability of polymeric materials used on electrical connectors per new Clause 28.4.2.
19.7.2		Clause added specifying requirements for evaluating heat pump clothes dryers.
21.13		Clause added specifying the requirements and minimum test parameters for protective controls.
21.13.4.3(b)		Clause revised specifying the maximum number of manual restarts permitted.
28.4.2 – 28.4.7		Clauses added requiring polymeric materials used on electrical connectors, and polymeric materials adjacent to electrical connectors to be of specific flammability rating; or comply with the new Nichrome Wire Test in Clause 16.8.
Supplement SB	Info	Supplement added permitting the use of alternative requirements for evaluating electronic controls in the appliance.
		CUSTOMERS PLEASE NOTE: This Table and column "Verdict" can be used in determining how your current or future production is or will be in compliance with new/revised requirements.
