

INDUSTRIAL SERVICES

Manufacturing

Facilities, R&D, and in-house Environmental, Health & Safety (EHS) managers and engineers know that smooth operation of their processes depends on a deep understanding of environmental risks and barriers to operations, and the need to properly manage them.

Intertek can provide a full range of EHS Industrial and Manufacturing Consulting services designed to support a wide range of EHS issues with minimal interruption to normal operations, all while ensuring that compliance needs are met and EHS concerns are addressed. Intertek's EHS services allow you to start your new process, continue your operations, or implement industry-leading EHS programs to differentiate yourself from the competition.

Our range of services includes:

- Indoor air quality (IAQ) assessments
- Chemical contamination assessments
- Pre-commissioning safety reviews
- Safety assessments and chemical management plans
- Confined Space Management
- Spills and Waste Management
- Building surveys and management plans for hazardous substances
- Peer review and 3rd party oversight

Our Services

Hazardous Material Assessment and Remediation Support:

Whether you want to reduce your EHS risk exposure, are responding to an occupant concern, or have experienced a sudden and unexpected occurrence like a fire, backup or flood, Intertek's qualified experts work to guide facilities, EHS, and R&D managers through assessment and remediation initiatives involving lead and asbestos, mercury and arsenic, isocyanates, water and mould damage assessments, chemical

contamination assessments, and smoke migration and residue assessments.

Indoor Air Quality Investigations:

New processes, new materials, and new construction activities all influence the quality of your facility's indoor air. Intertek's EHS experts can help you address worker or regulatory concerns, or can evaluate your process or facility to limit the likelihood of these concerns ever arising. Our services include volatile organic compound (VOC) assessments, guidance on managing emissions or fumes from new or existing processes, assessments for isocyanates, mercury, asbestos, lead, mould, or other chemicals of concern, post-fire indoor air quality assessments, and assessments for specific chemicals of concern from new or existing processes.

Site EHS Management:

Intertek's EHS experts have the industry experience to provide you with assistance to keep your project and operations moving forward, whether you require support with implementing audit findings, need to get a new process up and running, or have questions regarding how to manage environmental contamination found on your property. Our services include support with compliance assessment findings, facility audits for water, waste, energy, or emissions, site safety program and hazardous material management, construction site management, and pre-start and commissioning safety reviews.

The Intertek Advantage

With Intertek's range of complimentary teams and services such as: industrial hygiene, industrial field technical inspection services, pharmaceutical R&D and manufacturing, chemical manufacturing and refineries, and asset integrity management, Intertek can address all of your Environmental, Health & Safety needs within our global team. Intertek can support EHS requirements through every stage of design, construction, decommissioning and management, and support you through unexpected occurrences along the way.

Intertek is a leading Total Quality Assurance provider to industries worldwide. Our network of more than 1,000 laboratories and offices and over 42,000 people in more than 100 countries, delivers innovative and bespoke Assurance, Testing, Inspection and Certification solutions for our customers' operations and supply chains. Intertek Total Quality Assurance expertise, delivered consistently, with precision, pace and passion, enabling our customers to power ahead safely.
