preparation of scientific papers and presentations. Interfaced with regulatory agencies on clinical issues. Coordinated and oversaw execution of drug safety process. Managed internal drug safety staff. Responsible for identification and development of standard and custom preclinical models, and in vitro test development and implementation.

Consultant • 2010 – 2017

Developed and implemented strategic plans, policies and procedures. Built preclinical and clinical strategies including assay development on various platforms. Designed and developed assays from discovery to GMP. Designed, monitored and interpreted results of preclinical and clinical safety studies and protocol construction. Wrote and reviewed reports, prepared documents in various formats.

Director of Analytical Biology • SNBL • 2009 – 2010

Provided leadership and guidance on laboratory services and development. Maintained and monitored GLP and GCP compliance, study schedules, and process improvement. Assisted with design of experiment optimization of immunoassays. Developed and implemented strategic plans, policies and procedures, and managed budget. Collaborated with Senior Management to formulate and establish new marketing paradigms.

EDUCATION

Ph.D. • 1999 • University of Liverpool

Veterinary Pathology

M.Sc. • 1995 • Manchester Metropolitan University

Clinical Immunology

MB ChB/B.Sc. (Hons) • 1987 • University of Liverpool

Medicine

BSv (Hons) • 1985 • University of Liverpool

Applied Biology
