

ZDHC ACCEPTED LABORATORY

The Zero Discharge of Hazardous Chemicals Programme (ZDHC) has approved Intertek to provide wastewater and sludge testing services for its members through the ZDHC Provisional Laboratory Acceptance Programme.

Robust capabilities

Intertek supports the ZDHC Wastewater Guidelines through our vast network of labs participating in the Provisional Laboratory Acceptance Programme.

Strategically located throughout Asia and Europe in key supplier markets, our accepted labs are eligible to handle wastewater and sludge testing to the ZDHC Wastewater Guidelines, including for Man-Made Cellulosic Fibres (MMCF) production and leather processing, as well as to upload testing data to the ZDHC Wastewater Gateway on behalf of the suppliers.

In addition, Intertek is trusted by global textiles, apparel and footwear retailers, brands and manufacturers, to assure product quality and performance through testing, inspection and auditing.

ZDHC Accepted Lab List

Below is a listing of Intertek labs that participate in the Provisional Laboratory Acceptance Programme:

Sampling, testing and data uploading

- Bangladesh — Dhaka^{^*}
- Cambodia — Phnom Penh
- China — Shanghai^{^*}
- China — Shenzhen^{^*}
- Egypt — Cairo
- Guatemala — Guatemala City
- India — Bangalore^{^*}
- India — Gurgaon^{^*}
- India — Tirupur
- Indonesia — Jakarta
- Mexico — San Clemente^{*}
- Pakistan — Karachi
- Philippines — Makati City
- Portugal — Perafita
- Romania — Bucharest
- Spain — Zierbena^{^*}
- Sri Lanka — Battaramulla
- South Korea — Seoul

- Taiwan — Taipei
- Thailand — Bangkok
- Turkey — Istanbul^{*}
- Vietnam — Ho Chi Minh City^{^*}

[^] With MMCF testing capability
^{*} With leather testing capability
