Intertek Health Environmental & Regulatory Services (HERS) supports its customers with the technical know-how needed to submit the pre-registration under KKDIK.

Background
In June 2017 the new Chemical Regulation KKDIK (Turkish REACH) was published in the Turkish Gazette and this Regulation will replace the previous Chemical Regulation (CICR) which was published in 2008. As a result, all substances being on the Turkish market will have now again to be pre-registered under KKDIK, in order to maintain a phase-in status ensuring a transitional period prior to final registration, allowing the manufacturers to continue placing their substances on the Turkish market.

According to the KKDIK it will be possible to pre-register the substances starting from December 23rd, 2018 to December 2020. After December 2020 to December 2023 all the substance will have to be registered.

The most important difference between EU REACH and KKDIK is that the KKDIK requires that only trained and qualified Turkish experts submit the Safety Data Sheet and the registration. Besides that, there are no major differences between Turkey KKDIK regulation and EU REACH. To comply with KKDIK regulation, companies mainly need to take the following 2 steps:

1. Pre-register/register applicable substances >=1 t/y before given deadline. If your company is based outside of Turkey, you may need to appoint a local only representative.
2. Ensure that your safety data sheets are compliant.

KKDIK Turkish Representative Services
Through our legal entities in Turkey Intertek now also delivers a comprehensive KKDIK Turkish Only representative service as required by KKDIK, Article 9. This builds on our experience of Only Representation under the European Union REACH Regulation, Korea's Act on the Registration and Evaluation of Chemicals and Notifying Agent experience under China's Order No. 7.

KKDIK Pre-Registration Services
Intertek can submit the pre-registration on your behalf through the KKS system.

The Intertek Advantage
Intertek Health, Environmental & Regulatory Services (HERS) has extensive expertise and experience having supported many companies in their REACH registration and in the notification process according to the old Turkish regulation CICR. Intertek has the certified people to sign off the safety data sheet and the Turkish legal entity to support your company in all the KKDIK pre-registration process.

About Intertek
Intertek is a leading Total Quality Assurance provider to industries worldwide. Our network of more than 1,000 laboratories and offices and over 44,000 people in more than 100 countries, delivers innovative and bespoke Assurance, Testing, Inspection and Certification solutions for our customers' operations and supply chains.

Intertek Total Quality Assurance expertise, delivered consistently with precision, pace and passion, enabling our customers to power ahead safely.

Total Quality. Assured.
