SAFETY ASSESSMENT
AND REGULATORY
COMPLIANCE

To meet the challenge of bringing to market innovative, effective and safe cosmetics that satisfy consumers, Intertek offers wide range of services to ensure compliance with the evolving regulatory requirements throughout the product lifecycle which places product safety assessment and conformity at the heart of new developments.

Our safety assessment professionals can drive your conformity program, efficiently gathering relevant information, interfacing with your raw materials suppliers and your subcontractors. Helping you to achieve conformity of your products.

Safety Assessment of ingredients and Finished Products

Intertek's Toxicology specialist network throughout Europe, Asia and America, can offer:

- Safety files for ingredients by an accredited, specialised and experienced team, capable of carrying out expert assessments on all types of ingredients, from the most simple to the most innovative
- Cosmetic Product Safety Report in accordance with Regulation (EC) No. 1223/2009 and safety pre-assessment of your formulas
- Bioequivalence report for double sourcing your Raw Materials
- Recommendation for in vitro tests and clinical studies to be carried out before marketing
- Scientific and regulatory support for new product development and consultancy on complex projects (i.e. inhalation risk assessment)
- Predictive toxicological assessment using *in silico* tools: "read-across" concept, QSAR (structure/activity relationship)
- California Proposition 65 compliance services
- Safety Data Sheet

European Regulation Conformity

Our Regulatory Affairs and Safety specialists can be your dedicated full service provider enabling you to outsource any of the following:

- Product Information File (PIF): collection, creation, verification and compilation
- Regulatory expert assessment of ingredients in accordance with Annex I, part A
- Electronic notification via the CPNP portal
- Labelling verification, translation and validation
- Technical assistance and consultancy

International Regulations

Intertek is your partner to assist you with marketing your cosmetic products and perfumes throughout the world:

- Regulatory and documentation support for exports to China, ASEAN, Latin America, Middle East, Canada, etc.
- Conformity Certificate for exports to Africa and the Middle East
- Registration of your new ingredients
- EU & International regulatory support for finished products (PIF, CPNP notification, Canadian compliance and notifications for cosmetic and OTC products, and California Prop 65)

In order to complete these assessments and files, Intertek can also perform laboratory testing and clinical studies.

Intertek Total Quality Assurance expertise, delivered consistently with precision, pace and passion, enabling our customers to power ahead safely
