

STANDARD INFORMATION

This SUN establishes the Continuing Certification and withdrawal of ULC S303 and introduces ULC S304 as the superseding standard.

Superseding Standard Number: ULC S304

Superseding Standard Name: Control Units, Accessories and Receiving Equipment for Intrusion Alarm Systems

Superseded Standard Number: ULC S303

Superseded Standard Name: Local Burglar Alarm Units and Systems

EFFECTIVE DATE OF NEW/REVISED REQUIREMENTS

Effective Date: **September 1, 2020**

IMPACT, OVERVIEW, AND ACTION REQUIRED

Impact Statement: Effective immediately, this revised standard will be exclusively used for evaluation of new products. The Third Edition of ULC S304 consolidates the requirements of, and supersedes, CAN/ULC-S303-M91 (R1999).

Continuing Certification:

- New and revised products submitted for certification on and after the effective date will be required to be investigated to the latest version of ULC S304. All new and revised products that would have been previously certified to ULC S303, will then be investigated to the latest version of ULC S304.
- Existing certifications of these products will be allowed to continue to be certified after the effective date and will not be withdrawn provided there are no changes to the design that require a certification decision or until a new/revised requirement in Standard ULC S304 is determined as “Action Required” to require a file review in the future. For example, if changes to the design, ratings, or the use of alternate components requiring a certification decision are submitted after the effective date, the product (in its entirety) will need to be evaluated to the latest version of ULC S304.

Current Listings Not Active? – Please immediately identify any current Listing Reports or products that are no longer active and should be removed from our records. We will do this at no charge as long as Intertek is notified in writing prior to the review of your reports.
