

## STANDARD INFORMATION

**Intertek is making a change to how we will handle product listings to UL 651 and UL 651A going forward. If you are an existing customer under quarterly surveillance, you will be allowed to continue as you are today, with the exception of additionally required annual testing.**

**If you bring a new factory online, launch a new product, or make a change to your formulation, you will be required to enroll into the Intertek Satellite program which will entail monthly inspections at your factories.**

**For all existing reports, Intertek will be updating your Intertek Listing Reports to include the required annual testing (see below). Test samples will be sent to Intertek Plano, TX. This will be effective for the 2021 calendar year.**

**A request for samples will be sent out from Intertek at a later date.**

### **Standards:**

UL 651, Schedule 40, 80, Type EB and A Rigid PVC Conduit and Fittings

UL 651A, Schedule 40 and 80 High Density Polyethylene (HDPE) Conduit

## EFFECTIVE DATE OF NEW/REVISED REQUIREMENTS

**Effective Date: June 1, 2021**

## IMPACT, OVERVIEW, AND ACTION REQUIRED

**Impact Statement:** Any modification to the polymeric formula, any new factory locations, or new product listings will require that you enroll into Intertek's Satellite program, which includes along with other requirements, monthly inspections.

These annual follow-up tests will be added to existing listing reports:

- Tensile Strength
- Extrusion/Molding-Process Test
- FTIR, DSC, TGA
- Deflection Under Load
- Resistance to Crushing
- Low Temperature Handling (UL 651A only)

***Current Listings Not Active? – Please immediately identify any current Listing Reports or products that are no longer active and should be removed from our records. We will do this at no charge as long as Intertek is notified in writing prior to the review of your reports.***
