

MINERALS GLOBAL CENTRE OF EXCELLENCE

A new technology and innovation centre with a focus on automation and sustainability to provide our clients with faster, safer, higher quality, more efficient analytical solutions.

Minerals Global Centre of Excellence, is located in Perth, Western Australia, a key global centre for the minerals and mining industry. This new bespoke space consolidates Minerals operations into a 20,000sqm facility housing over 500 employees. The state-of-the-art laboratory will support our customers in the mining and minerals industry, giving them access to trusted expertise in mineral testing, inspections and analysis. Providing a broad portfolio of services under one roof significantly enhances delivery of our Total

20,000sqm
facility housing over
500 employees

Quality Assurance (TQA) customer promise and streamlines our superior customer service.

As regulations change and technology is created or innovated, our knowledge and leading industry experts assist customers in meeting these ever-changing demands. Intertek is constantly evaluating new instrumentation and technology to continuously improve quality, safety and efficiency and deliver value for our customers. As the leader in operating automated robotic laboratory systems for the mining industry, Intertek's new facility includes eight robotic automated systems, including sample preparation, XRF and wet chemistry systems. Utilising advanced technology and innovation with a strong focus on automation, Intertek provides our customers with faster, more efficient analytical options that increase production without compromising on quality.

True to our purpose, Bringing Quality, Safety and Sustainability to Life, this new facility will feature 3030 x330W solar panels making it one of largest rooftop solar installations in Western Australia. The facility will also capture and recycle laboratory wastewater to conserve this precious resource.

A key feature of the new Intertek Minerals Global Centre of Excellence is MineralSpace, a unique multifunctional dedicated customer space. This collaborative, immersive and multiple configurational venue is available to our customers and industry bodies for presentations, technical seminars, workshops and events. Customers will have access to state-of-the-art AV and video conferencing technology to help them connect with the world. MineralSpace will feature a 4.8-metre interactive screen allowing 32 separate touchpoints where customers and visitors can immerse themselves in the world of Intertek and interactively explore the services available at the Minerals Global Centre of Excellence. Customers can access our world-class global technical experts and services at the touch of their fingers.
