

Home Appliance Testing

Test your products in our labs, not in the market.

Intertek

Valued Quality. Delivered.

Streamline your global compliance strategy with Intertek's industry-leading expertise.

Intertek has a history of strong partnership with home appliance manufacturers to launch new products to the market. All appliance manufacturers face tough challenges – compliance with varying and complex requirements for each market as well as smart, aggressive, and global competitors.

To quickly launch new innovations, you need to understand global performance and compliance requirements early in the product design process. For the final products to stand apart, you need to understand the strengths and weaknesses of your competitors' products and be certain your product offers compelling advantages.

At Intertek, we've spent over a century honing the expertise and resources needed to help you meet your challenges, optimize new product introductions, protect and build your brand, and compete successfully in the global marketplace.

Intertek's breadth of services, global footprint, quick testing turnaround, ETL certification, and leadership in product performance benchmarking are just a few of the reasons why the appliance industry relies on us. Discover all the ways Intertek can help you ensure product success.

Product Testing Services

Safety Testing

Ensuring your product is safe is of the utmost importance. For safety certification we offer our proprietary ETL Listed Mark. With over 85,000 product listings, ETL is the fastest growing product certification mark in North America.

Performance & Energy Efficiency Testing

We offer performance testing for virtually any appliance or electronic and test to national, international, or industry standards, as well as retailer, or a manufacturer's own, specifications. Your goals and market objectives dictate which services are best suited for your product.

Intertek offers Energy Efficiency testing to meet global requirements. We know your products need ENERGY STAR® ratings to be more successful in the marketplace, and Intertek is the only EPA-Recognized Certification Body to cover certification for all electrical and gas ENERGY STAR product categories.

Intertek offers the following options to enhance your product's market value:

- EMC Testing
- Smart Grid Services
- Energy Storage and Battery Testing
- Accelerated Stress Testing
- Failure Analysis and Materials Testing
- Intertek's Quality and Performance Mark
- Benchmark and Comparison Testing
- Trade Association Testing
- ISTA Packaging Testing

Environmental Testing

Consumers and governmental bodies are driving the need for your home appliances to meet environmental compliance. Learn why Intertek is the right solution for environmental testing, including to the RoHS Directive.

Global Research & Certification

In today's global market, your products must meet a variety of safety standards and industry requirements. Our Global Market Access services offer guidance, testing, and certification to the legal, technical, and market requirements of over 100 countries.

As a Certification Body in the international CB Scheme, Intertek offers a simplified way of obtaining multiple national safety certifications. We help get your products into more countries faster and easier, with more international locations and expertise than any other testing provider.

Intertek's experienced teams can manage the entire product design and certification process from beginning to end, saving you the time and expense involved with global testing and certification.
