

Shale Oil & Gas Expertise

Shale oil and gas testing, inspection, metering, sampling and consulting.

Intertek

Valued Quality. Delivered.

Intertek shale oil and gas testing, inspection, metering, sampling and engineering services provide crucial industry support for the entire supply-chain, for a wide range of exploration, production and logistics requirements. Intertek's expertise helps clients operating in the Marcellus, Utica, Bakken, Eagle Ford, Permian Basin, and other shale formations across the world.

Shale services include:

- **On-site sampling**
- **Natural gas analysis**
- **Isotopic Analysis for both liquids and gases (IRGC/MS)**
- **Crude Oil and condensates testing**
- **Crude oil railcar inspection and testing**
- **Ship, barge, pipeline, and terminal cargo inspection and testing**
- **Metering and calibration**
- **Services conform to ASTM, API, GPA and other industry standards**
