Valued Quality. Delivered.

RoHS 2 – 2011/65/EU

The recast of the EU RoHS Directive

The recast of the EU RoHS Directive, also known as RoHS 2 and the RoHS Recast, officially known as Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment (recast), was published in the Official Journal of the European Union on July 1, 2011 and enters into force on July 21, 2011. This will repeal the existing RoHS Directive 2002/95/EC.

How does your company plan to meet these new requirements for RoHS compliance?

The Challenge

The recast expands the scope of covered products and is now a CE Mark Directive. Since it is now covered under the CE Mark requirements, companies need to ensure conformity assessment procedures are in place to align with module A of Annex II to Decision No 768/2008/EC. This includes the use of Standards, Supplier Management, Testing and other mandatory activities to ensure compliance.

If you are not implementing these requirements, you must remove the CE mark from your electronic product!

Our Solutions

RoHS Technical File Creation

Intertek provides a RoHS-2 Technical Documentation Creation service to assist EEE product manufacturers to meet the new conformity assessment requirements.

RoHS Bill of Material (BoM) Assessment and Conversion Services

Intertek specializes in a comprehensive range of Bill of Material data gathering and assessment services, converting your products' Bill of Materials into a RoHS compliant state.

RoHS Risk Assessment and Risk Mitigation Program

Intertek will define material and supplier risk within the product, and using CENELEC adopted standards from IEC, will compile a risk mitigation

strategy that ensures compliance to the new RoHS Directive.

RoHS Testing Services

Intertek provides RoHS compliance product and material screening and testing services through a global network of laboratories.

RoHS Compliance Assurance Services

Intertek provides consulting to revise the quality management system and the factory audit to confirm compliance.

RoHS Product Certification Services

Intertek's Green Leaf Mark identifies a product that has been independently certified and found to conform to the requirements of the RoHS Directive.

The Intertek Advantage

Intertek is a leading provider of quality and safety solutions serving a wide range of industries around the world. From auditing and inspection, to testing, quality assurance and certification, Intertek people are dedicated to adding value to customers' products and processes, supporting their success in the global marketplace. Intertek has the expertise, resources and global reach to support its customers through its network of more than 1,000 laboratories and offices and 30,000 people in over 100 countries around the world.
