

Eurasia REACH

Regulatory Services

Intertek can successfully guide your new/existing chemicals through the Eurasia-REACH registration/notification process, using our extensive regulatory and scientific expertise.

Background

The "Technical Regulation of Eurasian Economic Union on Safety of Chemical Products - TR EAEU 041/2017" (also referred to as Eurasia-REACH) was approved on 3rd March 2017. The Eurasia-REACH regulation establishes mandatory requirements for any chemical substance(s), mixture, or other chemical product intended to be placed on the market in EAEU states (i.e., requirements for the safety of chemical products, conformity assessments, product identification and labeling, and terminology).

As of **2 June 2021**, importers and manufacturers of chemical products must comply with the regulation.

Requirements

Companies are required to submit registrations of their chemical substance(s) to a Member State authority within the EAEU. The type of registration will vary depending on whether the chemical is new or existing.

- Existing substances will receive an individual registration number
- New substances will require an additional notification procedure

Notification/Registration

Governing authorities within the EAEU are currently compiling an Inventory of Existing Substances. The known deadline is **1st August 2020** to finalize the inventory in Russia.

It is important for companies to ensure that their chemicals are listed in the Inventory by notifying their existing substances. An inventory notification consists of filling out a proposed form containing basic information for existing substances.

Foreign Businesses:

Foreign companies located outside of the EAEU intending to place their chemical substance(s) on the EAEU market may submit their existing chemical substances to the Inventory and register later via a 'Nominated Representative'.

The Intertek advantage

Intertek is the single source solution for complying with the registration, testing, and documentation requirements of Eurasia-REACH.

Our Solutions:

- Development of registration/notification strategies
- Pre- and post-notification consultation
- Listing substances in the Chemical Inventory List
- Classification and Labeling of substances
- Compiling/Registration of Safety Data Sheets
- Eurasia-REACH Only Representation
- Preparation and submission of registration documents

- Preparation and submission of notifications of new substances
- Further monitoring of registration/notification status

Intertek is a leading Total Quality Assurance provider to industries worldwide. Our network of more than 1,000 laboratories and offices in more than 100 countries, delivers innovative and bespoke Assurance, Testing, Inspection and Certification solutions for our customers' operations and supply chains. Intertek Total Quality Assurance expertise, delivered consistently with precision, pace and passion, enabling our customers to power ahead safely.

Total Quality. Assured.
