

Field Evaluation Services

Electric Vehicle Supply Equipment

Valued Quality. Delivered.

Use Intertek's field label to comply with standards and codes.

Intertek enables manufacturers to get revolutionary products to market faster. We offer one-stop testing, evaluation and certification solutions for all Electric Vehicle Supply Equipment (EVSE) that could ultimately re-charge the automotive industry.

Are you seeing red? Have you been 'red-tagged' by an inspector or official who will not approve your installation because electrical codes or product safety regulations have not been met? The Authorities Having Jurisdiction (AHJs) can shut you down until your installed equipment is evaluated to required standards for safety.

That's where Intertek can help. Intertek's Field Evaluation services will have you back in the black, quickly and affordably.

Quick Intertek Facts

- Intertek Group plc is listed on the London Stock Exchange – FTSE 100
- We operate in more than 100 countries with over 30,000 employees
- For immediate assistance, call our hotline at **1-888-ETL-MARK**

Valued Quality. Delivered.

Intertek's Field Evaluation Process

Our Inspectors will walk you through the process, evaluate your product and assist you in obtaining approval from the Authority Having Jurisdiction.

We Put You Back in Business - FAST

Count on Intertek to speed up the Field Labeling process and get your business back in the black. With laboratories and offices across the U.S., we respond to your evaluation request quickly. Our technical staff are trained to evaluate your product at the installation site, efficiently and accurately.

The ETL Field Evaluation Label

Once your EV Supply Equipment has been evaluated and is found to be in compliance with industry standards and requirements of the AHJ, the Intertek inspector will apply an ETL Field Evaluation Label.

The ETL Label is the proof you need and indicates to AHJs that your equipment meets all specified safety requirements.

Accreditations

Intertek is an accredited Test Lab and Certification Body by the Standards Council of Canada (SCC) and in the U.S. is an OSHA recognized NRTL. Authorities Having Jurisdiction (AHJs) in 50 states and throughout Canada accept the ETL Mark as proof of product safety. Today, the ETL mark is featured on millions of products sold by major retailers.
