intertek

Total Quality. Assured.

SATELLITE: DATA
ACCEPTANCE PROGRAM

Take control of your product testing & certification

Intertek's SATELLITE program is the only data acceptance program that gives you total control. Now you can expedite access to Intertek's valued certification marks, ensuring market access and providing a competitive advantage.

The Industry's Most Innovative Data Acceptance Program

It took the industry's most innovative and flexible ATIC partner to design and launch the industry's most innovative and flexible data acceptance program.

SATELLITE gives you more power over your compliance program, providing three levels of progressive control: Classic, Enhanced, and Ultimate.

Depending on your level of expertise and self-sufficiency – ranging from simple testing using Intertek as witness through the complete set-up, test, and report-writing by you – SATELLITE delivers cost, timing, and speed benefits that no other program can match.

Cost

Significantly reduce your testing costs with greater transparency and predictability. Using your own resources, you'll be able to predict exactly what those internal costs will be – and increase or reduce them as necessary.

Intertek's program fees are competitive with other established and well-known data acceptance programs, and when you compare

the benefits of our program to theirs the value is clear.

Classic
- Similar to traditional "witness testing". Testing conducted by your staff in your lab, while Intertek engineers observe.
- We provide certification.

Enhanced
- You control testing without Intertek present.
- We perform construction review, prepare reports, and provide certification.

Ultimate
- You control the construction review, testing, and prepare reports without Intertek present.
- We provide certification.

Timing

Control Testing & Certification scheduling to match your production timelines. Nothing is more frustrating than working hard to meet a deadline, only to meet a barrier with your

compliance partners. That won't happen with Intertek. Our teams work to meet your schedules and deadlines, and our SATELLITE program is optimized to allow you to schedule testing when you need it, where you need it.

Speed

Faster certification means shorter time-to-market and greater revenue potential. That's where speed makes a difference.

We help to train your teams and ensure testing and reporting is completed correctly and as efficiently as possible, and then commit to as fast as 5 day turnaround on the certification.

Market Access

The same way Intertek provides access to global markets when testing in our laboratories, you can plan for a truly global launch via SATELLITE with access to every certification mark in every region around the world. We'll even provide the necessary training and education on those global requirements when needed.

# SATELLITE: DATA
ACCEPTANCE PROGRAM

Choose Your Level of Control

It's never been easier to plan, budget, allocate resources, execute, and review your annual product compliance program.

Ultimately you need to get your products tested and certified before shipping them to markets around the world. But SATELLITE is so much more than that.

When you choose the level of direct control you have over your program, it gives you unprecedented transparency over your time and costs. You get training and access to Intertek's testing and certification experts to ensure the program runs smoothly. And our dedicated SATELLITE team will provide you with priority status and service on every project.

Our __Classic__ level brings convenience and speed via Witness Testing (whether live or video). It's

SATELLITE delivers the certifications you need to be successful around the world.

Classic

- Location convenience
- On-site technical support
- Lab review and capability assessment
- Project scheduled in 48 hours
- Direct Connect™
- LENs (Video Witness Testing)
- Test report and authorization to mark within 10 business days upon test completion
- Dedicated SATELLITE™ Coordinator

Enhanced

Includes All Classic Features, PLUS:

- Authorization to mark within 10 business days of receiving product info and test data
- Lab recognition
- You control testing
- Weekly project review
- Dedicated engineering
- Executive review
- Biannual SATELLITE® training
- Annual personalized training
- You control unrecognized component testing
- Enhanced savings

Ultimate

Includes All Classic and Enhanced Features, PLUS:

- Authorization to mark within 5 business days of receiving product info, test data, and report
- You control construction review, product testing, and test reports
- Dedicated engineering with direct access to our Chief Engineers
- Ultimate savings

never been easier to get started with a data acceptance program.

If you choose to increase your investment of resources, equipment, and in-house expertise over time, you can easily progress to our more sophisticated levels of SATELLITE.

__Enhanced__ allows you to conduct your own testing on the product and its components. This gives you 100% control over the scheduling of your tests.

Our engineers are available to provide guidance and support, but with Enhanced Control you simply provide us the test data and we will write your reports and submit them for certification.

Progressing all the way to our __Ultimate__ control

tier provides you with the utmost power over your compliance program. You have the authority to conduct your own construction reviews, product and component testing, and write/submit your own test reports.

Intertek's role is to support you as needed throughout the process, and to deliver your certification within five days of receiving the data and reports. It truly is absolute control over your product testing program.
